

Kyada Ayush Bharatbhai

Ahmedabad, Gujarat | 72018 98457 | ayushkyada2124@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

• PROFESSIONAL SUMMARY :

Aspiring AI/ML Engineer and MCA student with practical experience in Python, Generative AI, Machine Learning, and Computer Vision. Skilled in LLMs, AI Agents, LangChain, OpenCV, and REST API development. Experienced in building AI-powered applications, intelligent automation systems, and desktop assistants through internships and personal projects. Strong analytical and problem-solving abilities with a passion for creating real-world AI solutions.

EDUCATION :

- Master of Computer Applications (MCA)
Silver Oak University 2024 – 2026
- Bachelor of Computer Applications (BCA)
Silver Oak University 2021 – 2024

WORK EXPERIENCE :

• React.js & MongoDB Intern

N R Crew | Jun 2024 - Dec 2024

- Developed responsive dashboards and data-driven user interfaces using React.js and MongoDB.
- Integrated backend APIs and built analytics components to visualize business data effectively.
- Collaborated with the development team to improve application performance, scalability, and business insights.

• PHP Developer Intern

INFOTRONICX Pvt. Ltd. | Mar 2024 - May 2024

- Optimized SQL queries and managed structured datasets to improve database performance.
- Implemented data validation, authentication, and business logic for enterprise applications.

• AI/ML Intern

Darpy Solutions | Dec 2026 - May 2026

- Developed AI-powered applications and intelligent automation systems to solve real-world problems.
- Researched, tested, and implemented AI/ML solutions while applying strong analytical and problem-solving skills.

CERTIFICATIONS :

- Operationalize Generative AI Applications (Generative AI Ops) – Microsoft | 2026
- Operationalize Machine Learning Models (MLOps) – Microsoft | 2026

TECHNICAL SKILLS :

- **Programming Languages & Frameworks :** Python , JavaScript
- **Artificial Intelligence & MLOps :** Large Language Models (LLMs) ,AI Agent Architectures, LangChain ,Prompt Engineering , Intent Recognition ,Task Decomposition ,NLP , Ai Agent , MLOps Fundamentals
- **Computer Vision :** OpenCV ,Real-time Object Detection ,Face-based Biometric Authentication Image Generation Systems
- **Databases :** MySQL , Sqlite , Mongo DB
- **Tools & Version Control :** Github , Git
- **Additional Skills :** Problem Solving , Analytical Thinking , Software Development Lifecycle ,System Design Fundamentals

PERSONAL PROJECTS :

TalentScout Recruitment Analytics Chatbot :

- Developed an AI-powered recruitment support system using NLP techniques.
- Processed candidate-related information and generated intelligent recommendations.

AI Autonomous Smart Response System :

- Integrated secure face authentication using OpenCV.
- Developed intelligent task execution workflows using AI and automation techniques.

NeuroDesk – AI Intelligent Desktop Assistant :

- Created a desktop assistant using Python for productivity automation.
- Implemented voice-based interaction and command processing.

Object & Face Detection System :

- Achieved 92% detection accuracy using OpenCV and TensorFlow. Implemented age and gender prediction features.
